Sirius : The Plowman

I just discovered this so I thought I would put all of this together into one post concerning this particular Star System.

This is the creation location of this solar system and is also, assuredly, where the Creator came from when He arrived here and our Sun is in a binary orbit with this Sirius so this Constellation is, no doubt, the source upon which all other Esoteric Mysteries are founded upon as the sure bedrock upon which was built an enduring Legacy.

Using the ancient Star Names and finding the Hebrew Root Word that spawned them helps us cut through a lot of Esoteric Red Tape and get back to the original truths told all those years ago.

Significantly, which was the motivation for doing this research, these Hebrew Root Words prove Procyon was the original Minotaur called Khenitaur.

Procyon itself is probably a hold over word, after all these years, in the English 'prescience' or foreknowledge which is true, intrinsically, with only the Creator.

8327 shurash shaw-rash strike into the soil, to root

5518 ciyr seer to boil up, spring up rapidly
5590 ca ar saw-ar to rush
5591 ca ar sah'-ar whirlwind
5628 carach saw-rakh extend the hand, spread, stretch
5630 elyron sir-yone' coat of mail
5633 ceren seh'-ren a peer, lord
7604 sha'ar shaw-ar swell up
7607 sh'er sheh-ayr flesh as swelling out, body, flesh, food
7786 suwr soor to vanquish, to rule, to crown, reign
7788 shuwr shoor to turn, travel about
7789 shuwr shoor going round

Adhara & Aludra : Adoration

Couldn't find any real content on Puppis but a hint of a 'measure' of 'gold' and a 'viper' which is interesting because Apophis is the serpent in the underworld.

Put those together with 'concealed' 'knowledge' and throw in Nais which means 'lift up' and Tureis which is the same thing as Taurus and Rigor and what do you get?

Yeah, Serpenteaus and Honey from the Bull.

It's probably not a coincidence that Canapus is right here also which is simply a play on words with Cannabis which was used in the Initiations.

Appendix

The Northern Barbarian Berserkers

Editor's Note : when I get time I'll redo this post but the summary is that the only groups of people that positively manifested a true Norse Berserker Rage (gleaned from the very naive article below) both originated in northern Europe and this was because they were supplementing their diet with Raging Bull Testosterone, which they called Honey (from the bull) Mead, whereas all other groups (Germans, Mongols, the Norse who didn't manifest the Berserker Rage and others throughout world history) used Horse Testosterone.

The Mongols actually had several horses each, and one of which they would use to drink the blood and a mare to drink its milk and a third (which most people don't know) was to drink its testosterone. Cum guzzling, literally, was par for the course in the ancient world (including from animals and I'm guessing the wives didn't complain any) and that is why Alexander the Great named a City after his beloved equine.

Among other evidence, both of these are implied by the very personal and distinct drinking Cups the Norse and Germanics used (for very practical and obvious reasons) which are synonymous in the Mysteries (and society in general in most man caves) with Male Group Communion.

Be all you can be, know what I mean.

Now you know what the Cornucopia is really referring to.

You also know why they had a zoo at Nekhen and how the Pharaoh really rejuvenated his youth at his Running with the Raging Bulls Sed Festival.

According to the texts, he was taking a drink from that well three times a day...

Berserks: A History of Indo-European "Mad Warriors"¹

MICHAEL P. SPEIDEL
University of Hawaii at Manoa

Berserks—blustering, mad warriors scorning wounds and death—embody the spirit of reckless attack. Though the berserk warrior tradition spans some three thousand years, its history has yet to be written. The following gives an outline of that history in five parts. The first part deals with the earliest known berserks at the end of the bronze age. The second traces berserks through the bronze, iron, and middle ages. The third part describes the berserk mind, and the fourth probes for patterns when berserks appear as attack troops alongside disciplined forces. The last, more tentative part looks at structures and functions of mad warrior styles worldwide by comparing Indo-European berserks with other similar warriors, such as Aztec *quachics* and India's *amoks*.

The new sources brought forward here widen the geographical range of the berserk tradition to include Mesopotamia. They add several centuries to the time span during which berserks are now documented and shed light upon the mentality of early warriors and their frenzies as they forged fearlessly into battle. Berserk warriorhood thus emerges as a long-lived, cross-cultural phenomenon that lends color and coherence to the early millennia of recorded history.

Snorri Sturlusson in the *Ynglinga saga*, written shortly after A.D. 1220, defines berserks as mad fighters without body armor:² "Woden's men went without hauberks and raged like dogs or wolves. They hit their shields and were strong like bears or bulls. They killed men, but neither fire nor iron hurt them. This is called *berserksgangr*." Berserk warriors thus scorned armor, willfully foregoing body armor. They also raged uncontrollably in a trance of fury. These two qualities define berserks, although many sources mention only one or the other, even in cases where warriors were both naked and mad.

Any troops either fighting madly or showing off recklessly, but not both, may be called merely "berserk-like." The Arab Ageyl were berserk-like when in 1917, before the attack on Wejh with Lawrence of Arabia, they stripped off their cloaks, head cloths, and shirts, saying that thus they would get clean wounds if hit, and their precious clothes would not be damaged. The reasons they gave were not all, for men are also proud of showing their bodies and elated with the wind streaming over their skin—Lawrence himself was as much taken with their "half-nakedness" as were the Romans with their Celtic foes. True berserks, however, are both naked and mad at the same time. This article will show that they stand in an age-old, well-defined tradition and, though not given their due by modern scholarship, form an essential part of world history.

And now we've cum full circle...

I know it's beginning and I know its end...
